

I'm not robot!

The MX is 100% cloud-managed so installation and remote management is truly zero touch making it ideal for distributed branches, campuses, and datacenter locations. Natively integrated with a comprehensive suite of secure network and assurance capabilities, the MX eliminates the need for multiple appliances. These capabilities include application-based firewalling, content filtering, web search filtering, NORTB[®] based intrusion detection and prevention, Cisco Advanced Malware Protection (AMP), site-to-site VPN, client VPN, WAN and cellular failover, dynamic path selection, web application health, VoIP health, and more. Auto VPN and SD-WAN can also be extended to resellers in public clouds with virtual MX appliances (VMX) available in Amazon Web Services (AWS) and Microsoft Azure.
